ALI SAAD DAWOOD, M.Sc.

Construction Manager · Project Engineer · Quantity Surveyor

Erbil, Iraq · +964 783 209 9481 · eng.alialbyati@outlook.com · LinkedIn: linkedin.com/in/ali-albyati · Portfolio: cv.liquid1611.com

PROFILE

Civil engineer (M.Sc.) with 7+ years delivering irrigation, drainage and hydraulic infrastructure in Iraq. Since Nov 2023, Construction Project Manager over a portfolio above 20 billion IQD (>$15M), running site operations, contract administration and quantity surveying together. Negotiated two phase-2 contracts worth $4.2M with the Ministry of Water Resources. Build my own AI and code tools for QS, scheduling and structural design, including WebSketch 3D, a BIM app for RC and steel modelling, analysis and design.

KEY STRENGTHS

Construction management: site execution, subcontractors and plant fleets, scheduling (Primavera P6, MS Project), WBS, progress and earned value, QA/QC, RFIs and submittals.

Quantity surveying: take-offs, BOQ, rate build-ups, IPCs, subcontractor valuations, variation orders and claims, material reconciliation.

Engineering & design: RC design and analysis (ETABS, WebSketch 3D), AutoCAD, Civil 3D, SketchUp, total station and level surveying.

AI & automation: Python, SQL, JavaScript; automated QS engine, site document dashboard, company ERP.

EXPERIENCE

Construction Project Manager & Digital Transformation Lead — Nov 2023 – Present

Nahi Karim Kazim Company, Wasit and central Iraq

Kut-Betera reclamation & irrigation project (23,000 acres, 40 km corridor)

- Revived the project after 2019 flood damage and sedimentation; recovered over 95% of planned infrastructure and completed 100% of the initial contract.
- Negotiated a $2M second-phase contract for canal maintenance and rehabilitation.
- Proposed and secured a new high-capacity central pump station in the investment budget.
- Negotiated 2 change orders with the Ministry of Water Resources and the General Board for Land Reclamation.

West Gharraf reclamation project (17,000 acres), Wasit — Aug 2024 – Present

- Managed canals, main and branch drains, box culverts, intakes, regulators and access roads.
- Negotiated a $2.2M second-phase contract for feeder canals to two sub-canals, plus 1 change order.
- Built a site dashboard giving engineers instant access to shop drawings, specifications and compaction and concrete test results.

Quantity surveying, controls and digital

- Built Python/SQL/JavaScript tools that automate QS and financial reporting, cutting report generation from weeks to seconds, linked to a scheduling app for real-time tracking.
- Leading development of a company ERP covering sales, accounting, maintenance, warehouse and HR, with change-management training for staff.

Senior Project Engineer, Tooz Khurmatu Syphon — Mar 2023 – Nov 2023

FAO General Company for the Implementation of Irrigation Projects

- 152 m reinforced-concrete syphon (8 box units, 51 m^3/s) and 400,000 m^3 earthworks serving over 160,000 acres.
- Prepared QS and financial documentation for contractors and subcontractors; produced shop drawings and site models (AutoCAD, Civil 3D, SketchUp).
- Managed submittals, RFIs, work orders, subcontractor applications and quotations; surveyed with total station and levels.

Research Assistant — Feb 2022 – Feb 2023

Universiti Sains Malaysia, with NAHRIM

- Built a sediment-transport model of the Kinta River to support hydrological research and river management.

Project Engineer, Diwaniyah-Shafiyah Reclamation (36,000 acres) Feb 2021 – Jul 2021

FAO General Company for the Implementation of Irrigation Projects

- 11 km main canal, 80 km distribution channels and 130 km closed conduits.
- Ran QS and financial reporting, document control, daily reports and schedules; supplied shop drawings to resolve design conflicts.

Project Engineer, Precast Concrete Factory, Al-Diwaniyah Aug 2020 – Feb 2021

- Directed daily production reporting and monthly financial statements; surveyed raw-material quantities; managed supply logistics.

Site Engineer, Dredging Project, Altun Kupri, Kirkuk Oct 2019 – Aug 2020

- Supervised excavator crews, site surveying and quantity and progress records.

EDUCATION

M.Sc. Environmental Engineering, Universiti Sains Malaysia, 2023 · **B.Sc. Civil Engineering**, Cihan University, 2018

TOOLS

ETABS, WebSketch 3D, AutoCAD, Civil 3D, SketchUp, Primavera P6, MS Project, Excel (advanced), Python, SQL, JavaScript, Google Workspace, Total Station, Level. Languages: Arabic (native), English (professional).
